DETAILED ACTION

1. This action in responsive to the communication filed on Aug. 28, 2008.
2. Claims 1, 3-16, 19-22 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system of key management in Distributed Sensor Network. Each independent claim identifies the uniquely distinct features of "each sensor node (sensor node has a low cost, limited in computation and information storage capacity, high power constrained and can communicate over a short rang wireless network interface with other sensor nodes or with controller nodes, Specification page 16, 1st paragraph) being pre-loaded prior to deployment thereof with respective key ring including of individually selectable private keys randomly chosen from a common pool, the key rings of at least a pair of said sensor nodes having a pre-defined probability of having at least one private key in common, wherein the storing/pre-loading a respective key ring further includes the step of: generating a key space having a multiplicity of keys, randomly selecting a pool of keys from said key space, assigning a specific key identifier for each key in the pool of keys, randomly selecting a distinct set of private key from said pool of keys to form said respective key ring for each sensor node; storing said specific key identifier with said respective key ring in each said sensor node. Each sensor node searching for another sensor node where a plurality of said key identifiers are broadcast to search for other sensor node with a matching of at least one of key identifiers, said matching key identifier indicating

the other sensor node has a private key in common therewith to establish a secure communication link therebetween". The art on record, taken either singly or in combination, fails to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
